

Join us to help lead the next wave of the digital economy.

Apto is a data centre company that designs, builds, and operates hyperscale data centres for our customers in high growth and emerging markets across Europe. Apto has been formed to develop and operate the European data centre assets of global investment manager, PIMCO, benefiting from access to scale, resources and land sourcing capabilities of one of the largest European real estate platforms. Guided by an esteemed leadership team with insights drawn from the world's digital and data centre titans, Apto brings over a century of combined experience in designing, constructing and operating data centres at scale.

From Day 1, the leadership team has focused on the type of company we want to build. We measure success by how well we demonstrate our values every day. We nurture an unfaltering passion for excellence, guided by our customers' needs and expectations. We obsessively take ownership, deliver on our promises, and create lasting positive impressions. We thrive on overcoming any hurdle to give our customers the best possible experience and outcomes. And, we have fun along the way.

Our access to capital and real estate is important but our most valuable asset is our team and we are delighted now to be recruiting for an Electrical Design Director.

The role

- Reporting to the Chief Development Officer, we are looking for an ambitious individual to lead our electrical design team.
- You will be entrepreneurial in nature and have the capacity to deal with ambiguity.
- You will own both the strategic and tactical elements of the electrical design working with other internal design team members to create safe, sustainable, reliable and cost-effective designs.
- You will be responsible for taking designs from concept, through permitting, tender, construction and commissioning phases culminating in a detailed Digital Record and Operational Building Information Model you can be proud of.
- You will play an active part working with our customers on both Built to Suit (BTS) solutions and modifications to Apto's Reference Design.
- You will own the electrical components of Apto's Basis of Design (BOD) document with a keen focus on energy efficiency and sustainability.
- You will own managing external electrical design consultants and Owner Furnished Client Installed (OFICI) vendors.

- You will work with our Preconstruction Director and Commercial Director to ensure your designs work from a schedule and commercial perspective.

Basic Qualifications

- Bachelor's degree in electrical engineering, or 10+ years of relevant electrical experience.
- 7+ years of experience with industrial or commercial electrical design.
- In-depth knowledge of data centre design, operation and maintenance of electrical systems including uninterruptible power sources, diesel generators, electrical switchgear, power distribution units, and automatic/static transfer switches.
- In-depth knowledge of relays, protection schemes, medium-voltage distribution system, power and distribution transformers, earthing, switching and Electrical Power Monitoring Systems (EPMS).
- Demonstrated ability to manage design vendors and OFCI vendors through full project life cycle.
- Knowledge of construction techniques and terminology including the ability to read and interpret construction drawings and documents is essential.
- Ability to manage, prioritize and successfully execute multiple concurrent mission-critical infrastructure projects.
- Demonstrated ability to work collaboratively with customers.

Preferred Qualifications

- Master's degree or higher in electrical engineering.
- Experience of working with large data centre providers in multiple European metros.
- Ability to lead team of engineers in advanced engineering and operational processes and procedures as they relate to large data centre environments.
- In depth knowledge of HV substation design.
- Experience with value engineering at preconstruction stage.
- Understanding of mechanical equipment and system design.
- Proven track record in creating high quality, consistent documentation for processes, standards and procedures.

Location

Dublin or London is preferable. Initially remote working will transition to hybrid approach once offices are established. We are flexible on where you work but we

would like to see you in person for meetings that matter. 50% travel across Europe.

Roger Gough – Chief Development Officer (CDO) at Apto.

Reporting

Apto is an equal opportunities employer.
